

Transform

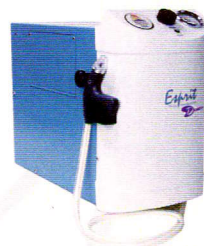

Transform your preconceived ideas about microdermabrasion with the Parisian Peel® Duette. The Duette, just one in our line of Total Skin Renewal products, is the most versatile skin treatment machine available today.

The Duette combines Parisian Peel Medical Microdermabrasion technology with the DiamondTome™ Skin Resurfacing System to allow you to switch from crystal-based to crystal-free treatments, not only between patients, but also during a single session.

The Duette, one of Parisian Peel's line of Total Skin Renewal products, features a special hand piece designed to increase operator control while minimizing fatigue, self-contained waste canisters, triple HEPA filtration for a clean treatment environment and a dehumidification system for clog-free operation.

Add in DiamondTome's multiple diamond-tipped treatment wands, in varying degrees of coarseness, to treat conditions ranging from simple exfoliation to superficial scar reduction, and the result is an increase not only in treatment options, but patient satisfaction as well.
